

Measuring Hinge Hole Centers

Step 1

Open the door and measure (in mm) from the top of the door to the center of the top hinge.

Step 2

Repeat the process but this time measure (in mm) from the bottom of the door to the center of the bottom hinge.

Step 3

If you have a larder unit with a single door, which has three or four hinges, measure these from the top down. Please be aware that full height larder doors are only available in certain ranges.

NB: If you are uncertain, please see the online 'How To' video for guidance or alternatively, please contact us direct.
